PEZAG A.S. TREST CZ

Pezag is a supplier that specialises in CNC turning, milling and sheet metal work.

Since 2007, Pezag additionally has an aluminium sand foundry.

Pezag has been active as a supplier for a long time in several markets, including the graphic, textile, and semiconductor industries. Pezag has customers in both Central and Western Europe.

In cooperation with Eurotech Aluminium Castings, Pezag ensures that the Eurotech Group can offer competitive products and compositions globally.

Small serial aluminium casting parts, turning parts and milling parts can be cast and/or processed at Pezag for an optimal price. The quality and reliability of the Pezag supplies are excellent. Thanks to the longstanding relationship with the Eurotech Group, the company Pezag is equipped to meet high requirements regarding quality and reliability.

Specialism

Pezag has 25 CNC processing machines for turning work and for milling work, a welding robot, grinders and various sheet metal machines.

Pezag has Rüttel press machines in the aluminium sand foundry, sand preparation and analysis equipment.

Pezag has a complete quality control department equipped with 3D CNC measuring machines for quality control. Measuring programs are made at Pezag or digitally supplied by the customer.

Pezag is a supplier that works with the most modern production and measurement methods.

Apart from a good machine park logistics are also very important.

Pezag has implemented a modern, integrated, production control system, "Visual Enterprise," for this.

Prototypes for serial production can be manufactured at Eurotech Venlo

(NL), depending on the product and the customer, or directly at Pezag.

If the preparation takes place in Venlo, Eurotech Venlo makes the production programs and measuring programs available to Pezag in digital format. The work preparation time can consequently be significantly reduced.

The cooperation with Eurotech Aluminium Castings is very good. Processing methods and machine programs are exchanged. Because the various companies possess several similar processing machines and measuring

equipment, a rapid exchange of products, knowledge and programs is possible.

The customer can rely fully on Pezag and the Eurotech Group for a reliable production process.
